*Discover the peaceful side of the Smokies!*

There's nowhere like the grand old Smokies, especially on the "peaceful side" where there are plenty of activities to make you want to extend your family's vacation. We have the Little River providing watery excitement with tubing, canoeing, kayaking, and of course, fishing! There's horseback riding both inside and out of the park and over 900 miles of maintained hiking trails within the park alone. A special bicycle trail in Townsend makes exercising great fun and being so close to the Great Smoky Mountains National Park, you can take full advantage of all it has to offer including: interpretive programs staged at area amphitheaters in season, hikes to waterfalls and the Sinks just down the road, and treks to everyone's favorite spot, Cades Cove, rich in wildlife, history and spectacular scenery.
